## Homework Assignments Math 260 Tentative

## Directions:

On the top sheet write: Number of problems done followed by the number of problems done in the entire book-work homework assignment (the total possible is given in the chart below beneath the due date/test date.) Some papers will be spot-checked and if the number of problems actually done does not match the number on the top sheet, the entire assignment will get zero points. Also, if the number of problems done is not written, points will be deducted.

The Homework assignment will be graded for problems COMPLETED for a possible minimum of ten points. On top of the homework should be included write-ups on all other assignments (if assigned). These will be worth at most eight points (total points: eighteen).
