

Homework Assignments Math 820 *Tentative*

Directions:

On the **top** sheet write: *Number of problems done* followed by the number of problems done in the homework assignment (the total possible is given in the chart below beneath the due date/test date.) Some papers will be spot-checked and if the number of problems actually done does not match the number on the top sheet, the entire assignment will get zero points. **Also**, if the number of problems done is not written, points will be deducted.

The book-work assignment will be graded for problems COMPLETED for a possible minimum of ten points. On top of the homework should be included any write-ups on all in-class assignments (if assigned). These will be worth at most six points (total points: sixteen).

The algebraic problems must be done in the form outlined on the ‘Steps and Rules’ sheet handed out in class.

Learning Community Opportunity

A learning community (a scheduled group study time with a tutor) will be established for this course by the Tutoring Center. You may earn two extra credit points for every session you attend.*

Self-Initiated Group Study

A group tutoring session consisting of **two to five** students from this class may be formed. The appointment is made with a tutor through the Tutoring Center. When you arrive at the appointment, let the Center know that you wish to get credit for the session, and they will fill out the proper paperwork. You may earn two extra credit points for every hour session you attend.* You may take advantage of this opportunity up through the last **regular** day of class.

Out-of-Class Assignment

Do one of the following before class on the due date: attend a Learning Community, or attend a Self-Initiated Group Study. This assignment is worth four points.

***Note on Extra Credit: you may only earn a MAXIMUM of sixteen extra credit points from the various extra credit opportunities.** (Enough points to cover one missed homework set.)
