

Unless otherwise instructed, test reworks will be graded using the following rubric.

Credit	Guidelines
full	<p><u>correct answer:</u> thorough, detailed, correct response using only our course materials as presented; maybe one minor science content error</p>
half	<p><u>correct answer:</u> diagnosis and/or generalization has major ideas present, but somewhat abbreviated or incomplete; more than half the science content correct OR diagnosis and/or generalization is correct but only halfway complete</p>
none	<p><u>correct answer:</u> did not follow instructions for proper diagnosis and generalization, e.g. diagnosis does not attempt to explain what you originally did, what you were originally thinking, how you arrived at the original answer, etc. and/or generalization does not attempt to broaden the scope to the larger conceptual understanding and remains focused only on that specific question, situation, etc. OR generalization has major errors in the science content OR either the diagnosis or the generalization contains variations of “you said”, “I looked it up”, “on page...it says”, “I know/remember”, etc. OR unreadable or incoherent diagnosis and/or generalization OR no meaningful attempt at diagnosis and/or generalization OR <u>incorrect answer:</u> may or may not have attempted a diagnosis or generalization OR <u>no meaningful attempt worthy of grading</u></p>

If test reworks are eligible for bonus homework points, the scoring is as follows.

Points	Guidelines
4	<p><u>correct answer:</u> thorough, detailed, correct response using only our course materials as presented; maybe one minor science content error</p>
3	<p><u>correct answer:</u> diagnosis and/or generalization has major ideas present, but somewhat abbreviated or incomplete; more than half the science content correct</p>
2	<p><u>correct answer:</u> diagnosis and/or generalization is correct but only halfway complete OR generalization has major errors in the science content</p>
1	<p><u>correct answer:</u> did not follow instructions for proper diagnosis and generalization, e.g. diagnosis does not attempt to explain what you originally did, what you were originally thinking, how you arrived at the original answer, etc. and/or generalization does not attempt to broaden the scope to the larger conceptual understanding and remains focused only on that specific question, situation, etc. OR either the diagnosis or the generalization contains variations of “you said”, “I looked it up”, “on page...it says”, “I know/remember”, etc. OR unreadable or incoherent diagnosis and/or generalization</p>
0	<p><u>correct answer:</u> no meaningful attempt at diagnosis and/or generalization OR <u>incorrect answer:</u> may or may not have attempted a diagnosis or generalization OR <u>no meaningful attempt worthy of grading</u></p>
